- Friendliness
- Sensitivity
- Tolerance

PROFILE

Passionate and honest individual with various working experience not only in my home country, but also abroad which developed more communicative, independent, mentally stronger and friendly person in me. After trying various working fields I found myself into Front web development in 2020. So far, I really enjoy it, as it motivates me to work hard and learn new skills.

EDUCATION

101 STUDIES / FRONT-END

"Code Academy", Vilnius, Lithuania I 2020 to 2021

A 9-month new generation study program - Studies 101. During first semester I've learned basics of 8 different programming languages - Java, JavaScript, PHP and others. On a second semester, I took a big step to Front-end web development direction and gained stronger skills on HTML, CSS, JavaScript. I've learned coding with Vue.js framework and React library, also learned how to use React Hooks, styled-components and storybook extensions. Furthermore, I gained knowledge about how to work on Node.js open-source environment and how to create and connect MySQL databases to various projects.

WEB DESIGN

"Code Academy", Vilnius, Lithuania I 2021 to 2021

In this course I've learned concepts of design, UX and UI. Gained knowledge about types of websites. Explored colors, sizes and other technical conditions for designing a website.

BIOMEDICAL DIAGNOSTICS

"Kaunas College", Kaunas, Lithuania I 2016 to 2019

Bachelor degree in Biomedical Diagnostics - study of the procedures, equipment, and products used to diagnose disease and ensure that they meet all the regulatory requirements.
